

Dear Woodscreek families,

I would like to introduce myself to you all and welcome both new & returning families to the campus.

I am Becky Tubb, my daughter Isabel has been in this school since she could barely walk & has progressed to the primary 1 class. I have been so impressed by the dedication of the teachers & the Montessori system that I recently joined the school board as part of the team for Buildings & Grounds. This I felt was an area that I could help in & dedicate some of my time to improve both the work & play environments.

This summer many of you may notice the new additions in & around the playgrounds, plus the remodeling of some areas in order to create more open space. Behind the scenes there have been many improvements made to the drainage issues & extraordinary amount of rocks our campus has. These improvements would not be possible without the dedicated help from families. These projects start with volunteers willing to assist with the fundraising, families donating time, material & sponsorship. The end result is the wonderful improvements that benefit our children & the campus.

I am reaching out to see if there are any parents who would like to be on a list to assist with future maintenance/construction projects. It would be a good way for a family to contribute to the 12 hours of cooperative time. Some of the hours can be done by individuals or as part of a team on larger projects. We are currently in the process of putting together a long term strategic plan for both the grounds & buildings. We welcome anyone who would be willing to assist in these future goals. The board proposes to have a subcommittee of willing volunteer's that can be called on to facilitate these upcoming projects.

To give you an idea of the proposed works, this may include someone to blow leaves during the fall months, replace some steps ready for winter, to help with fall/spring plantings, snow clearance around the campus, painting of deck rails, assisting with new decks or stage & helping to plan future building/engineering

works. The school provides all materials so most of the works require willingness to help & a good tool bag!

If you would be interested in helping us improve the campus please would you send me an email, I would like to put a list together so that we have an idea of expertise & interest.

I would like to thank everyone in advance & I look forward to hearing from you.
